Daily Management:	•
Reporting:	•
Presence Monitor:	<ul style="list-style-type: none"> • Presence Monitor • Area & Transaction Monitoring (optional)
Mail Confirmation to Host and Visitor:	•
Notifications:	• At check-in
System:	• Hosted or On-Premise
Security:	• IP Management
Updates:	• Included
Access Control:	• Integrated with SALTO ProAccess Space Software

TECHNICAL SPECS:

Server Operative System:	Windows 10 Enterprise, version 1803 or higher Windows Server 2012, version R2 or higher Windows Server 2016 R2 or higher
Microsoft Net Framework Requirement:	Net Framework 4.8 or higher.
SQL Database Engine Compatibility:	Microsoft SQL Server, version 2012 (Express) or higher
Hardware Requirements:	Processor: 1 GHz or higher. 32Bits or 64Bits. At least 2 CPU 2.5GHz and 4GB RAM is required. Hard disk space required: 50 GB. (Aprox., depends on the DB)

CLIENT TECHNICAL REQUIREMENTS:

Hardware Requirement For Client:	Processor: 1.6 GHz or higher. 32Bits or 64Bits. At least 2 CPU 2.5GHz and 4GB RAM is required.
Software Requirements:	Web browser compatibility Google Chrome Mozilla Firefox Microsoft Edge

FEATURES AND TOOLS TO FIT YOUR NEEDS:

Registration of a visitor or contractor

Various users of the BlueEntrance application possess the ability to sign up visitors or contractors. Employees can preregister or invite their own visitors and the reception can register visitors at the arrival. Depending the type of visit the period, time, reason of the visit and required access access profile can be added.

Based on the relevant conditions, a verification process can be implemented in BlueEntrance. Once the host confirms the arrival of the visitor or contractor, the registration process is then completed.

Upon successful registration, the visitor and host will receive a confirmation of the visit containing a QR code, pincode or digital key. These credentials are intended for use during the check-in proces. A calender invite will be included in the mail as well.

The check-in procedure involving the granting of access rights

If the visitor has pre-registered, they can choose to perform a self-check-in using the kiosk feature within the BlueEntrance application, accessible on the kiosk or tablet.

Following identity verification, a registration process can be customized according to your preferences. This process encompasses confirming relevant safety regulations and providing an access pass. The access key or digital key will be added to the SALTO Space system with the appropriate access rights.

Door opening

Following a successful registration and authorization process, the entrance door is unlocked by interacting with the kiosk, and the host is promptly notified of the visitor's arrival.

Key capabilities

The BlueEntrance application has the option to be installed on the same server as SALTO Space, either on-premises. Alternatively, SALTO Systems offers the solution as a hosted option.

Visitor (Pre)Registration or Invitation, Contractor Management, Passport Scanning, Employee Management, Pass Templates, Advanced Kiosk and Encoder Management, Integration BlueSafety E-Learning, Azure or HR system.

Through this distinctive approach, you streamline the process of registering, verifying, and granting accurate access privileges to both your visitors and contractors. Furthermore, this automated workflow guarantees a hospitable reception for your guests, enhancing the overall customer experience..

Access control system for visitor management

SALTO Space

Integrate easily with SALTO Space smart access applications and add visitors directly into your access control systems to ensure streamlined building access.

SALTO's BlueEntrance Space delivers digital visitor registration, check-in and check-out technology, and a streamlined smart access process for building management. The advanced, all-in-one software platform provides visitors, contractors, and guests with an enhanced, streamlined, and contactless smart access experience, with a robust visitor management system and SALTO's visitor kiosk models.

Digital key

Keep guest check-in simple and provide a keyless experience by delivering smart credentials to visitors, including RFID SVN smart credentials, QR codes, PINcode or JustIN Mobile digital keys.

Real-time reporting

See how many visitors are on-premise at any given time. Get up-to-date reports, data, and insights on access incidents, visit details, host activities, and more.

Within BlueEntrance, you have the capability to establish distinct zones, enabling you to monitor the presence of employees or visitors based on reader events.

Enhance security

The integration of BlueEntrance visitor management solutions within SALTO Space centralizes visitor registration and ID management, resulting in improved security, streamlined operations, and the acquisition of valuable data and insights. These benefits contribute to effective decision-making within various types of buildings.

Compliance

Achieve automated and stringent enforcement of compliance through the integration of visitor access and policy-based registration regulations across all locations.

- **Reduced wait times**, with streamlined pre-registration and automated check-in via the smart self-service kiosk.
- **Schedule and invite visitors**. Once they receive an invite, guests can complete their profile in advance via smartphone to receive a QR code or digital key.
- **Keep check-in simple** and completely keyless by delivering smart credentials to visitors.
- **Efficient, safe, and smart visitor access**. Manage all visitor details securely in our secure, all-in-one visitor management system.

This product is an innovative solution designed to keep people and buildings safe and secure while providing an enhanced visitor experience. BlueEntrance Space seamlessly integrates into SALTO Space smart access applications, including an already existing access control installation.
